

## ULTIMUS V8 FUNDAMENTALS

The Ultimus V8 Fundamentals training course is a self-paced eLearning opportunity to acquire a basic or “fundamental” understanding of the Ultimus Adaptive BPM Suite (Version 8.x), as well as to walk the student through successfully building their first V8 Process.

### PERFORMANCE OUTCOMES

---

- Create an Organizational Chart
- Design and build a Process Map
- Create and edit a Process XML Schema
- Add and configure User Steps
- Design and Test new Forms with standard controls, advanced controls and form objects
- Link XML Schema elements to Form controls
- Add and configure Email and MS Excel Flobot Steps
- Configure Web Service Flobots to integrate with iBAM KPIs
- Define Business Rules for Steps in a process
- Simulate a process
- Publish a process
- Perform process incidents in runtime
- Generate process Reports

### DELIVERABLES/LOCATION

---

The Ultimus V8 Fundamentals is delivered on-demand via the Online Training portal. Course Materials are all available for download via the portal, and the Virtual PC used for lab exercises can be delivered on DVD or downloaded via a portal link.

### INTENDED AUDIENCE

---

This course is intended for students who have little or no experience with designing or building business processes with Ultimus BPM Studio V8. While the primary audience is intended to be those who will be developing processes in Ultimus, it is also appropriate for anyone who wants to understand the fundamental aspects of how processes are built and implemented in an Ultimus environment.

### PREREQUISITES

---

There is no prerequisite training for attendance in this course. Students must be active customers or partners of Ultimus, Inc. Participation in the Online V8 Fundamentals does require a purchased annual subscription to the Online Training Portal.
