

ULTIMUS V8 JUMP START

The Ultimus V8 Jump Start training course is an Instructor-led workshop designed to help students acquire the skills required for successfully applying the tools of the Ultimus Adaptive BPM Studio (Version 8.x).

PERFORMANCE OUTCOMES

- Design sophisticated forms using standard and advanced Form Controls
- Develop re-usable Form Objects via the Form Object Library
- Prepare a process for development by Modeling a process via the BPM Studio
- Understand best practices around using the XML Schema at a Global, Process and Local level
- Work with XML Schema formulas
- Configure User Step Properties for any number of process requirements
- Gain an understanding of all Flobot types and how to properly configure them
- Create various Business Rules to meet processes' needs
- Develop and Test a number of complex processes that demonstrate Ultimus Engine logic and routing behaviors
- Learn how to optimize published processes
- Address advanced topics, such as debugging, ASP.NET form integration and .NET/Web Service extensibility

**** Student needs and interaction can influence the structure and depth of the course. ****

DELIVERABLES/LOCATION

The Ultimus V8 Jump Start can be delivered at any of our worldwide Ultimus Training Centers, onsite at a customer site (min. three participants), or online in a virtual classroom environment. Students receive a copy of a comprehensive V8 Training Student Guide and several handouts during the workshop. The classroom workshop is scheduled over 3.5 days (Tue-Fri), while the virtual workshop is planned for 5 half days (Mon-Fri) plus homework assignments.

INTENDED AUDIENCE

This course is intended for BPM Studio Developers who have acquired a fundamental knowledge of using the Ultimus BPM Studio to design and build basic processes. The primary audience is intended to be those who come from various programming backgrounds and will be developing processes in Ultimus.

PREREQUISITES

As a prerequisite for the V8 Jump Start course, students must complete the V8 Developer Fundamentals eLearning course and all of its associated exercises. Students must also be active customers or partners of Ultimus, Inc.
